

Slinger Signaller

The Aim of the Course is to:

Provide the candidate with the basic knowledge and practical skills involved in slinging loads and guiding cranes.

The Objectives of the Course are to enable delegates to:

- Establish the weight and dimensions of loads and communicate this information to the crane operator
- Select, attach and detach appropriate lifting tackle
- Direct the actions of a crane moving loads by giving clear signals to ensure safety of personnel and plant
- Determine the serviceability of tackle and how to maintain and store it correctly
- Have sufficient knowledge and practical skills to successfully complete the CPCS Technical Test.

Who Do We Recommend Attends The Course?

All personnel required to carry out the duties of a Slinger Signaller.

Course Summary

Candidates will participate in theory lessons and practical demonstrations / exercises, all of which are highlighted by the use of OHP & Videos covering;

- An Introduction to the Construction Industry
- Current relevant regulations
- Code of signals
- How to calculate safe working loads
- Effects of varying the angles of multi-leg slings
- Hazards associated with crane operation and how to avoid them
- CPCS Technical Test Theory Element

Course Duration

This depends on the experience and number of candidates, the ratio of candidates / machines per Instructor.

Health & Safety Training / Testing

It is recommended that all candidates attend a 1 Day CPCS specific Health and Safety Course.

The CSCS Operatives Health and Safety Test must be successfully completed prior to taking the CPCS Technical Test.

Testing / Certification

All candidates will complete the Full (Theory & Practical) CPCS Technical Test and on successful completion will be issued with a CPCS Red Trained Operators Card

Companies who are CITB Levy Payers can claim grants to cover some of the costs of the training and tests.
