SSP – Site Management Safety Training Scheme - VIRTUAL

Aims

The SMSTS course covers all relevant legislation affecting safe working in the building, construction and civil engineering industries. It highlights the need for risk assessment in the workplace, the implementation of the necessary control measures and adequate communication to sustain a health and safety culture within the workforce.

Who Attends

This course is for you if you're considering, or already have, responsibilities for planning, organising, monitoring, controlling and administering groups of staff e.g. site manager.

Course Content

- Introduction to health and safety law, duties, responsibilities, enforcement and sanctions
- Overviews/explanations of relevant construction activity legislation
- Accident costs, causes, investigation, prevention and reporting requirements
- Risk assessment and principles of prevention
- Safety management systems, policies, plans, performance and measuring
- Management of Contractors
- Development of safe systems of work and permit systems
- Effective communicating
- Behavioural science including awareness of human error

  Motivating safety behaviour:
- Recognition of an organisation's duties and responsibilities
- Recognition of responsibilities of Managers, Supervisors and Operatives
- Production of site activity instructions (safe system of work)
- Planning for health and safety within the context of a project
